

MAINONE - 5 Years Making Strides in the Industry

MainOne

MainOne is celebrating 5 years of leadership in transforming West Africa's internet landscape.

On July 1st 2010, MainOne commenced operations with a clear vision to bridge the digital divide between West Africa and the rest of the world. It launched its services as a submarine cable operator with its 7,000km fibre optic cable spanning from its two landing points in Nigeria and Ghana to Portugal.

In 5 years, MainOne has evolved its business and today the company delivers services in 8 West African countries and provides a comprehensive bouquet of Connectivity and Data Center Services. Serving over 400 Large Corporates, Telcos ISPs, Government and Educational Institutions, MainOne has fast become the preferred choice for broadband services in the region due to its operational excellence and quality of service. MainOne has been recognised with various awards and accolades including being the Number 1 Carrier of IP Traffic out of West Africa.

MAINONE MILESTONES AND ACHIEVEMENTS

- Number 1 Internet transit provider in West Africa- highest lit capacity on its submarine cable.
- Interconnected with the London Internet Exchange (LINX), Amsterdam Internet Exchange (AMIX), Nigerian Internet Exchange (IXPN) and the Ghanaian Internet Exchange (GIX)
- Invested over \$300m in infrastructure in West Africa towards improving connectivity and data Center services in West Africa.
- Highly availability and reliable services with zero downtime experienced on its core submarine cable infrastructure over its period of operations.
- Services delivered to 8 countries in West Africa.
- Launch of a Tier III Uptime Institute certified Data Center.
